

I do listen to regular radio only during the morning when i get off of work because the 2 morning shows in my area I like. I think the satellite radio is a good invention and it has been the best \$300 bucks i spent. I get tired of the same commercials 2 or more dozen times a day, or the same songs played about 5 or more times a day. I like the variety and I think congress should leave it be, its getting rather old them telling us what we can and cant do concerning the most trivial of subjects. Let us have one good thing once in a while and enjoy without constantly standing behind us admonishing us for something we enjoy, we still have some freedoms here dont we?
